Instructions for configuring wireless communication at BGU on Mac OS X 10.6

These instructions will work unless you tried to configure wireless communication on campus without these settings.

1. In order to configure wireless communication, you should be in range of the wireless signal.

2. Go to upper right side of the desktop and press on the following icon:

![Wireless Icon](image)

You will see a menu of the wireless networks in range of your computer. Select the network named: “BGU-WPA”

3. After several seconds you will see the following window:

![Password Window](image)

Insert your User Name and Password as you received at BGU and press the “OK” button.
4. After several seconds you will see the following window:

Press the “Continue” button. You should see the following window:

Insert your Name and Password on the computer and press the “OK” button.
5. Please wait several seconds and open your preferred browser (Safari, Firefox, Chrome...). You should see the following site in your browser:

![BGU Online Network Registration](image)

Insert your BGU **Username** and **Password** and press the “Accept” button.

6. At the next window, please fill in your details and press the “Continue” button.

7. After completing the registration wait 3 minutes and restart the computer.

Good luck.

Troubleshooting wireless communication at BGU in Mac OS X 10.6

1. Open “System Preferences...” and press the “Network” icon. You should see the following window:

2. Press the “Turn AirPort Off” button and afterwards press the “Advanced” button. You should see the following window:
3. Under the “Preferred Networks” category select “BGU-WPA” wireless network and press the “minus” button. This should delete the wireless network named “BGU-WPA” from the “Preferred Networks”.
4. Press the “802.1X” button at upper right side of this window. You should see the following:

5. Under “User Profiles” category, select the item named: “WPA: BGU-WPA” and press the “minus” icon at bottom right corner. This should delete the item named: “WPA: BGU-WPA”.

6. Press the “OK” button to close this window, and then press the “Apply” button at the bottom right corner. Afterwards close this window.
7. Now, you should see your computer’s desktop. Press the “GO” menu item as shown below and select “Utilities”.

In the window that opened, double click on “Keychain Access” utility. You should see the following window:
8. Select “login” item under “Keychains” category and “All Items” under “Category”. If you see on the right side of this window item named: “rdw.auth.ad.bgu.ac.il” select it and delete it. In order to delete it you will be asked to insert your compuer's User Name and Password as shown below:

![Password Input](image)

Insert your Name and Password, then press “OK” button. Now, press again the delete button on your computer's keyboard. The item “rdw.auth.ad.bgu.ac.il” will disappear.

9. In the same window select the item “WPA: BGU-WPA” and delete it. This item will disappear from the list. Close this window and **restart** the computer.

10. Press the wireless signal icon and select “Turn AirPort On”
