

Vacant Position: Faculty member

Ben-Gurion University of the Negev
Faculty of Engineering
Department of Materials Engineering
Beer-Sheva, Israel

The Department of Materials Engineering seeks an outstanding candidate for a tenure track position. Applications will be considered in all areas of materials science and engineering. Priority will be given to the following areas: physical metallurgy, electronic materials and materials for renewable energy.

The applicant should either have experience in, or show potential for, leading a research group that involves supervision of students, technicians and research associates, applying for grants, international collaborations and generating links with industry.

The applicant is expected to teach undergraduate and postgraduate core courses in materials science and engineering.

Applicants should submit an application packet containing a cover letter, curriculum vitae, names and contact details of three referees and a research plan.

All applications should be submitted electronically to Prof. Nachum Frage, e-mail: nfrage@bgu.ac.il. Please submit PDF files only.

The application deadline is 20 March 2013 and the review begins in early April.
