The 14th Karniel Computational Motor Control Workshop

March 13-15, 2018

Keynote: John Rothwell, University College of London
Confirmed speakers: Andrea Davella, University of Messina, IT
                  Elizabeth Torres, Rutgers University, USA
                  Carsten Mehring, Albert-Ludwigs-University Freiburg, GE
                  Opher Donchin, Ben-Gurion University
                  Maura Casadio, University of Genova, IT
                  Tony Prescott, University of Sheffield, UK
                  Bernadette van Wilk, University College of London, UK
                  Simon Little, Oxford University, UK
                  Dana Cohen, Bar-Ilan University, IL

Karniel Young Investigator Award: Apply by November 30, 2017 for award and lecture

The workshop will include an intense day of short lectures and poster sessions, followed by a day hiking in Israel’s beautiful natural landscape. We encourage participation of those who are interested in computational aspects in the experimental design, data collection and data analysis, as well as those who feel their work might be interesting to computational researchers and have an interest in developing the computational component of their research.

Scientific committee: Lior Shmuelof, Opher Donchin, Ilana Nisky, Sandro Mussa-Ivaldi, Ehud Ahissar, Eilon Vaadia, Nicole Malfait
