

Mr. Nir Caliv

*Principal Test Architect,
Microsoft, Israel*

Short bio:

Nir is a Principal Test Architect in Microsoft R&D center in Israel. 11 years ago after a B.Sc. in Computer Engineering from Technion, Nir has joined Microsoft, starting out as a software design engineer and later on as software design engineer in test, test lead and now Test Architect, and subject matter expert (SME) in test.

Nir has vast experience and proficiency in software development, testing, architecture & implementation of automated engineering systems and processes, for achieving quality goals.

In the last two year Nir have been working on Cloud projects, adjusting Engineering processes and Testing for frequent and continuous delivery and move to Testing in Production.

Nir is also consulting and mentoring, development and test, engineers and managers, around test strategy, methodology and tools.
