GRADUATE AND POST-GRADUATE POSITIONS

For an advanced and exciting research in the field of next generation memory devices, Faculty of Engineering at Tel Aviv University is looking for capable and motivated individuals at all levels (M.Sc., Ph.D., and post-docs).

Excellent students and engineers with scientific (physics/chemistry) and/or engineering background are welcome to apply. Several positions are available for this project, effective immediately. Successful applicants will be eligible for full scholarships.

Due to interdisciplinary nature of the project, the project team members will be able to specialize in a variety of research topics and acquire skills in materials physics & chemistry, electrical engineering, and state-of-the-art characterization and processing.

Interested candidates should send their detailed curriculum vitae to Prof. Ilan Goldfarb (ilang@eng.tau.ac.il).
