

Program

The 23rd Sede Boqer Symposium on Solar Electricity Production

September 5-7, 2022

George Evens Family Auditorium Jacob Blaustein Institutes for Desert Research Sede Boqer Campus

Monday September 5, 2022

9:00 - 9:30

Arrival and Registration at the George Evens Family Auditorium, Blaustein Institutes for Desert Research, Ben-Gurion University of the Negev (Midreshet Ben-Gurion)

9:30-10:00

Opening Greetings – 23rd Sede Boqer Symposium

Chair: Eugene Katz

Raz Jelenik, Vice-President & Dean for R&D, Ben-Gurion University of the Negev Ariel Novoplansky, Director, The Swiss Institute for Dryland Environmental Energy Research, Ben-Gurion University of the Negev Gideon Friedman, Chief Scientist, Israel Ministry of Energy

10:00-11:30

Session 1.1: Broader Perspectives and New Ideas in Photovoltaics I

Session Chair: Dan Oron

Gideon Segev (Tel-Aviv University) Extraction of the Spatial External Luminescence Efficiency in GaAs Using Photoluminescence Measurements and Optical Modeling

Eran Edri

(Ben-Gurion University of the Negev) Holding Both Ends of the Solar Spectrum: Quasi-one-dimensional Photovoltaic Materials for the Infrared and Visible Range

Jeffrey Gordon

(Ben-Gurion University of the Negev) Concentrator Photovoltaics for Space Missions

11:30-11:50

Coffee break

11:50-12:45

Session 1.2: Keynote Lecture

Session Chair: Eugene Katz

Christoph Brabec

University of Erlangen, Germany "Accelerating Lifetime Engineering of Emerging-PV Technologies"

12:45-14:00

Lunch

14:00-16:00

Session 1.3: Perovskite Photovoltaics I

Session Chair: Monica Lira-Cantu

Yana Vaynzof

(Technical University of Dresden)
New Concepts for Perovskite Photovoltaics

Dan Oron

(Weizmann Institute of Science) Quantum Spectroscopy Applied to Perovskite Nanomaterials

Christiane Becker

(Helmholtz Zentrum Berlin)
Nano-optical Designs Enhance
Monolithic Perovskite/Silicon Tandem
Solar Cells toward 29.8% Efficiency

Doron Azulay

(Hebrew University of Jerusalem & Azrieli College of Engineering)
Photo-electrical Properties of Quasi-2D
Perovskite Comprising Diammonium
Spacer Molecules with Hydroxyl
Functional Groups

16:00-16:20

16:20-17:50

Session 1.4: Theoretical Studies Session Chair: Christiane Becker

Leeor Kronik

(Weizmann Institute of Science)
Defects, Defect Tolerance, and Selfhealing in Lead Halide Perovskites: First
Principles Perspective

Avi Niv

(Ben-Gurion University of the Negev) Thermodynamic Considerations of the Photovoltaic Systems Detailed Balance Law

Francesco Buonocore

(ENEA, Casaccia Research Center, Rome) Functionalization of Nanomaterials Driven by ab initio Calculations

18:00

One bus returns to Beer-Sheva

18:15

Buses to Mitzpe Ramon for dinner and cultural event

19:00-20:15

Dinner

20:15-10:15

Astronomy – The Desert Skies in September

The opportunity to observe the wondrous night sky under the dark-sky conditions of the Negev Highlands desert is not something that everyone has the opportunity to enjoy on a regular basis. A special program for this time of year will be presented, including observations through telescopes. The program lasts about two hours. Warm clothing should be brought, as desert nights are chilly. [Guiding provided by *BaTeva*]

Tuesday September 6, 2022

9:00 - 9:30

Arrival at the George Evens Family Auditorium, Blaustein Institutes for Desert Research, Ben-Gurion University of the Negev (Midreshet Ben-Gurion),

9:30-11:00

Session 2.1: Electrochemistry and Photoelectrochemistry

Session Chair: Iris Visoly-Fisher

Daniel Grave

(Ben-Gurion University of the Negev) Charge Carrier Photogeneration and Collection in Metal-oxide Thin Film Photoelectrodes for Solar Fuel Production

Avner Rothschild (The Technion)
Decoupled Water Splitting for Green
Hydrogen Production:
Reshaping Water Electrolysis

Muhammad Bashouti

(Ben-Gurion University of the Negev) Fabrication and Surface-Functionalization of Semiconductor Nano/micro rod arrays

11:00 -11:20Coffee break

11:20-12:10

Session 2.2: Keynote Lecture
Session Chair: Oded Millo

Yury Gogotsi

Drexel University, Pennsylvania, USA "MXenes – Synthesis, Optoelectronic Properties and Solar Energy Applications"

12:10-13:30 Lunch

13:30-14:45
Poster session I in lobby of Evens

14:45-16:45

auditorium

Session 2.3:

Organic Photovoltaics

Session Chair: Francesca Brunetti

Nir Tessler (The Technion)

The Interplay between Device and Material Properties in Determining Solar Cell Performance

Gitti Frey (The Technion) Glassy Phases: The Silent Players in Organic Solar Cells

Pavel Troshin (IPCP RAS)

Intrinsic and Extrinsic Degradation Pathways in Organic Absorber Materials for PV Applications

Jens Wenzel Andreasen

(Technical University of Denmark) Model Supported in-line Characterization of Roll-to-Roll Coated Organic Solar Cells 16:45-17:00

Coffee break

17:00-19:00

Session 2.4: Solar Electricity: Industrial Perspective

Session Chair: David Faiman

Yuval Zohar (Head of Policy, Planning & Emergency, Electricity Authority) Ashalim Solar Projects in Light of National Renewable Energy Goals

Achiam Tigger (Negev Energy Ashalim) Experience of Operating the Largest Solar Storage in Israel

Pierre Kohn (EDF Renewables - Israel) Ashalim1 vs. Ashalim2: GenX / GenY - PV Solar Plants Evolution

Nimrod Levy (ICL) Green Sdom project – ICL

Discussion

Wednesday September 7, 2022

9:00-9:15

Arrival at the George Evens Family Auditorium, Blaustein Institutes for Desert Research, Ben-Gurion University of the Negev (Midreshet Ben-Gurion),

9:15-10:10

Session 3.1: Keynote Lecture Session Chair: Avner Rothschild

Uri Banin

(Hebrew University of Jerusalem) "Semiconductor Nanocrystals for Photocatalytic Applications"

10:10-10:30

Coffee Break

10:30 - 13:00

Session 3.2: Perovskite Photovoltaics II

Session Chair: Yana Vaynzof

Francesca Brunetti

(University of Rome) From Flexible Perovskite Solar Cells to Large Area Modules: Challenges and Perspectives

Monica Lira-Cantu

(Catalonian Institute of Nanoscience and Nanotechnology) Halide Perovskite Solar Cells: Strategies for High Stability

Iris Visoly-Fisher

(Ben-Gurion University of the Negev) Environmental Effects of Pb Leaching from Photovoltaic Halide Perovskites

Mark Khenkin

(Helmholtz-Zentrum Berlin) Perovskite Solar Cells in Outdoor Conditions: Year of Continuous Operation

Lioz Etgar

(Hebrew University of Jerusalem) Bifacial Fully printable low dimensional perovskite solar cells

13:00-14:15

Lunch

14:15-15:15

Poster session II in lobby of Evens auditorium

15:15-16:45

Session 3.3: Agro-Photovoltaics Session Chair: Naftali Lazarovich

Abraham Kribus (Tel-Aviv University) Agrovoltaics: Achievements and Challenges

Andrea Reale

(University of Rome Tor Vergata) Semi-Transparent Polymer Solar Cells & Modules for Greenhouse Applications: An Innovative Approach for Agrivoltaics

Roei Grimberg

(Ben-Gurion University of the Negev) Effect of Semi-Transparent OPV Modules Installed Inside Greenhouses on Microclimate and Crops

16:45-17:05

Coffee Break

17:05-18:35

Session 3.4 Solar Thermal Technologies

Session Chair: Avi Niv

Carmel Rotschild (The Technion) Modular CSP based on a New Heat Engine for 100% Solar Availability at Grid Parity

Gennady Ziskind

(Ben-Gurion University of the Negev) Thermal Energy Storage: State-of-the-Art and Future Trends

Alon Lidor (ETH Zürich)

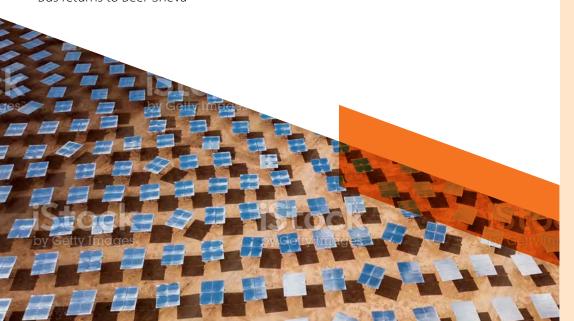

Development of High Temperature Heat Recovery System for a Solar Redox Reactor

18:35

Closing remarks (Eugene Katz)

18:50

Bus returns to Beer-Sheva

Abstracts for the poster session

(In Alphabetical Order by Presenter)

Experimental Investigation of Self-Cleaning Solar Panel Device using Electrodynamic Force, **David Amidan**, (NRCN – Nuclear Research Center of the Negev)

Process for the Synthesis of Nanostructures based on Twodimensional Materials under Concentrated Solar Irradiation, Timothée Barbe, PROMES-CNRS & University of Perpignan

Visible to Near infrared all Inorganic Perovskite - PbS-conjugated Nanostructures and their Optical Interaction, **Tal Binyamin**, Hebrew University of Jerusalem

Binder Free TiO2 Paste for Flexible Polymer Dye Sensitized Solar Cells, **Kishore Kumar Devarepally**, Ben-Gurion University of the Negev

(BiXSb1—X)2Se3 Thin Films for Short Wavelength Infrared Region Solar Cells, Yaniv Dror, Ben-Gurion University of the Negev

Voltage Matched Multi Junction Solar Modules, **Moshe Einav**, Kfar Uria

Enhancing the Performance of State-ofthe-Art Solar Cells Using Universal Hole Transport Layer, Hela Fadool, The Technion Mapping the Spatial Contribution to Photoluminescence and Photovoltage in Perovskite Solar Cells, Mor Fiegenbaum-Raz, Tel Aviv University

In-situ study of Photoluminescence Degradation of Perovskite Thin Films under Concentrated Sunlight, **Rafael Fleischman**, Ben-Gurion University of the Negev

Conversion of Solution Deposited PbS Thin Films to MAPbI3 Perovskite, Naama Gatenio, Ben-Gurion University of the Negev

Influence of IR Solar Radiation Filtering on Solar Cell, **Or Gindy**, Shamoon College of Engineering

An Examination of Molecular-Wires Metal Oxide Hybrid Materials as a Protective Layer for Halide Perovskite Photoelectrodes, Yuval Harari, Ben-Gurion University of the Negev

Machine Vision Based Characterization of Perovskite Thin Film Properties, **Milan Harth**, Technical University of Munich

Enhanced Photocatalytic Activity of Cs4PbBr6/ WS2 Hybrid Nanocomposite, Philip Nathaniel Immanuel, Ariel University

Nickel Nitride Passivation Stabilizes Halide Perovskite-Based Inverted Solar Cells, Anat Itzhak, Bar-llan University

Halide Perovskite-Based Inverted Solar Cells, Naga Prathibha Jasti, Bar-llan University New Deposition Method for Pb-Free Halide Perovskite, with Tunable Bandgap and Improved Stability, Adi Kama, Bar-llan University

Efficiency Enhancement of P3CT-NA Based MAPbl3 Solar Cells via Interfacial Engineering, **Said Kassou**, Ben-Gurion University of the Negev

Automated experiment guiding of cSpBbR3 Perovskite Quantum Dots, loannis Kourdoudis, Technische University Munich

Benign Solution-processed (BixSb1-x)2Se3 Alloys for Short Wavelength Infrared Solar Cells, **Jitendra Kumar**, Ben-Gurion University of the Negev

Direct Hot Carrier Impact on Photovoltage of a Solar Cell, **Oleksandr Masalskyi**, Vilnius Technical University

Ratchet based Ion Pumps for Fine Tuning of Electrochemical Reactions, **Dafna Meltser**, Tel Aviv University

Pb Sequestration to Prevent Possible Pollution of the Environment from Halide Perovskite-based Devices, Rene L. Mendez, Bar-llan University

Photovoltaic Operation at Extreme Temperatures, **Gilad Moses**, Ben-Gurion University of the Negev

Integrated Back Contacts Silicon Solar Cells as a Platform for 3-Terminal Tandem Solar Cells and Hybrid Photoelectrochemical Tandem Cells, **Eyal Nir**, Tel Aviv University Highly Efficient Semitransparent
Perovskite Mini-Module for Four Terminal
Tandem Integration by Optimization
of Transparent Conductive Oxide,
Gopinath Paramasivam, HelmholtzZentrum Berlin

Sputtered and Thermally Evaporated MoO3 Thin Films as a Buffer Layer for Perovskite Solar Cells, Ramarajan Ramarathen, Ariel University

Ink-Jet Printed TiO2 Thin Layers with Embedded Au Nanoparticles as Functional Layers for Perovskite Solar Cells, **Sofia Rubtsov**, Ariel University

Enhanced Specular Back Reflectors for Broadband Light Absorption in Metal Oxide Ultrathin Film Absorbers, Sa'ar Shor-Peled, Ben-Gurion University of the Negev

Investigating Fine Electronic Structure in Carbon Nitride Materials by Electron Paramagnetic Resonance Spectroscopy, **Ekatarina Shabratova**, Helmholtz-Zentrum Berlin

Optical and Electrical Performance of an Agrivoltaic Field with Spectral Beam Splitting, **Ben Shalom**, Tel Aviv University

"Cold" Composite TiO2 Electron Transport Layer for Perovskite Photovoltaics, Mykola Shatalov, Ariel University

Self-Healing in Lead Halide Perovskite Thin films, **Pallavi Singh**, Weizmann Institute of Science Climate Change Mitigation: Drylands Conversion to Photovoltaic Fields vs. Afforestation, **Rafael Stern**, Weizmann Institute of Science

Towards the Commercialization of Perovskite Solar Cells: Encapsulation Strategies and Outdoor Stability Testing, Kenedy Tabah Tanko, Catalonian Institute of Nanoscience and Nanotechnology

Solvent Composition Regulates the Optical Bandgap and Work Function of Antimony Selenide Nanowires Deposited from Thiol—amine Solvent Mixtures, Anchal Vashishtha, Ben-Gurion University of the Negev

Novel Interlayer Between the Photoactive and Hole Conductive Layer in Perovskite Solar Cells, **Sudhakar Vediapan**, Ben-Gurion University of the Negev

Polymeric 2D Dielectric Array for Solar Cell Absorption Improvement: Simulation and Dip-pen Nanolithography (DPN) Fabrication, Ravit Yosupov, Shamoon College

Controlling the Device Functionality by Solvent Engineering, Solar Cell versus Light Emitting Diode, **Shir Yudco**, Hebrew University of Jerusalem
