The Department of Biomedical Engineering at Ben-Gurion University of the Negev seeks applicants for multiple tenure-track faculty positions at all levels. We seek to recruit outstanding faculty with preference to graduates of engineering programs who perform research from all areas of biomedical engineering. An area of particular interest is experimental/theoretical biomechanics.

Ben-Gurion University of the Negev will provide competitive startup package and conditions for such outstanding candidates. Applicants must have a PhD degree in Biomedical Engineering or related disciplines, and outstanding academic and research records. Faculty duties include teaching at the undergraduate and graduate levels, research and supervision of research students.

Candidate applications should include a description of professional interests, vision statements and goals in both research and teaching. Each application should include a curriculum vita and the names and addresses of three or more individuals who will provide letters of recommendation.

All materials should be sent by email to the department chair at donchin@bgu.ac.il.
