Name of the module: Oncology 5th Year Medicine

Number of module: 4718-5083

BGU Credits: 2.5
ECTS credits:
Academic year: 5th year medicine.
Semester: First & Second semester, 10-days course.
Hours of instruction: 8:15am–4:00pm
Clinical exposure (clinics and inpatient ward): 31 hours.
Lectures: 6 hours.
Clinical discussions: 12 hours.
Location of instruction: Department of Oncology, Internal medicine building.
Language of instruction: Lectures will be given in Hebrew.
Position: Obligatory module intended for 5th year medical students, as part of their clinical teaching.
Field of Education: Clinical Oncology.
Responsible department: Department of Oncology, Soroka University Medical Center.
General prerequisites: Students should complete successfully the following module: 4th year course in oncology.
Grading scale: Successful passing of an oral summarizing exam.

Course description: Clinical exposure in oncology, including medical oncology and radiation therapy.

Aims of the module: The goal of the oncology module is to be familiar with the clinical manifestations and treatment of most common types of cancer.

Objectives of the module: Objectives are to enable students to understand the clinical course of the most common types of cancer, and therapeutic approaches according to clinicopathologic features.

Learning outcomes of the module: On successful completion of the course, the student should be able to:

1. To understand the clinical course of the most common types of cancer.
2. To be able to analyze the clinical condition of a cancer patient and suggest treatment approaches.
3. To understand the specific biology of several common types of cancer, and be able to implement this knowledge on other rare types of malignancy.

Attendance regulation: Attendance in this clinical course is obligatory.

Teaching arrangement and method of instruction: Attendance in doctors' offices during the clinic; clinical rounds in the inpatient ward; case-presentation by students; summarizing frontal lectures or frontal lectures on rare cancer types.
