

Danny Shapira is a Lecturer at the Department of Business Administration at the Guilford Glazer Faculty of Business and Management in Ben Gurion University, Israel. He received his Ph.D. from the Hebrew University of Jerusalem in the Racach Institute of Physics. His research mainly concentrates on complexity of market dynamics, diffusion of innovation and emergence of collective behavior in social systems. Danny applies in his interdisciplinary work ideas and methodologies that are rooted in the field of statistical mechanics to social sciences. He was awarded the Young Scientist Fellowship granted by the Yeshaya Horowitz Association through the Center for Complexity Science (This fellowship program helps outstanding young scientists integrate into Israeli academic institutes as tenure track lecturers and researchers).
