

Dr. Tomer Shushi is a lecturer in the Department of Business Administration, Guilford Glazer Faculty of Business and Management, Ben-Gurion University of the Negev, Beer-Sheva, Israel. Tomer's research focuses on risk management and risk measurement, actuarial science, uncertainty, and finance. In his research, Tomer investigates and develops quantitative models for financial and actuarial risks, systemic risks that allow analyzing systems of mutually dependent risks, and extreme events. He also investigates loss distributions and their characteristics, optimal portfolio allocation and modern portfolio theory.

Tomer has a B.A degree in the multidisciplinary program in Economics and Computer Science from Bar-Ilan University, Israel (2011) which he finished with honors. He received his M.A. degree in Statistics (2015) with Dean award for academic excellence and a Ph.D. (2016) both from the University of Haifa, Israel.
