The aim of this course is to provide students with the skills necessary for academic writing in economics. It will enhance the main features of academic essay writing, including its organization, aims and rules while paying attention to the unique characteristics in the different fields of economics. In addition, it will discuss the choice of topic, looking for sources, collecting data, writing strategies, and the organization of the material into one coherent piece.

The course is based on the reading of imperative articles in economics, their analysis, presentation and summary. It will consist of task handing, presentations and discussions and an independent article summary will be handed and presented in class by students in the end of the semester.

Dr. Keren Van der Beek
