The course name in Hebrew:
'תיודור כלכלה - מאקרו 'ב'

The course name in English:
Macroeconomic Theory II

Course Code: 142-2-0321

Name of the lecturer:
Dr. Nadi Ben Zeev

Course Objectives:

Understand the fundamental models and methods of macroeconomics that form the basis of macroeconomic research, both theoretical and empirical. The emphasis of the course will be on short-term economic fluctuations. 

The course will focus on advanced macroeconomic models that are at the forefront of research in macroeconomics. First, we will study models in which macroeconomic analysts use to understand macroeconomic processes. Second, we will learn modern empirical methods in which macroeconomic empirical analysts use to better understand what drives business cycles. We will study the important articles in the relevant fields during the course.

Requirements:

This course requires full attendance at all lectures and active participation in class discussions. In addition, the student must demonstrate understanding of the course material through homework assignments and exams. All homework and exam questions will be in English.
