Application for the 2017
Eric and Wendy Schmidt Postdoctoral Award
for Women in Mathematical and Computing Sciences

We are pleased to announce The Eric and Wendy Schmidt Postdoctoral Award for Women in Mathematical and Computing Sciences for 2017. This year again up to 10 women completing a PhD at a research university in Israel will be able to apply for this prestigious award. If chosen by the selection committee (listed below), they will receive a stipend of US$50,000 for use during a postdoctoral fellowship abroad. The program is open to all women completing a PhD at a research university in Israel in the fields of mathematical and computing science or engineering and expect to graduate in 2018. We will also consider applications from early-career (less than three years after PhD graduation) untenured women faculty in universities in Israel who are considering a research leave abroad as well as renewal requests from laureates of the 2016 program.

All candidates should submit a complete application before May 15, 2017 at https://easychair.org/conferences/?conf=spap2017 (selecting the “Candidates” track). They will need to enter their contact details, various types of academic information and most importantly the contact details of at least 3 references (preferably from different institutions). We recommend that the candidates reach out to their referrers well ahead of time and ask them to upload their support letter at https://easychair.org/conferences/?conf=spap2017 (selecting the “Referrers” track) before May 15, 2017.

Candidates may inquire by sending mail to info-israel-postdoc@schmidtsciences.org.

Stuart Feldman, Head of Schmidt Sciences
Yoelle Maarek, Chair of the Selection Committee

Selection Committee
Shiri Artstein-Avidan, Tel Aviv University
Hagit Attiya, Technion
Ron Brachman, Cornell Tech
Rivka Carmi, Ben Gurion University
Israel Cidon, Technion
Michael Elhadad, Ben Gurion University
Stuart Feldman, Schmidt Science
Orna Kupferman, Hebrew University
Yoelle Maarek, Yahoo Research
Moni Naor, Weizmann Institute
Jennifer Rexford, Princeton University
Jeff Rosenschein, Hebrew University
