Ment.io provides a transparent and inclusive discussion board, fostering credible collaborative thinking. Promote deeper learning and equal opportunities in education, in and out of the classroom.

Deeper Discussions, Seamless Assessment

The discussion abilities in class are limiting!

Discussions are far from being inclusive, and only partly reflect the collective knowledge. Evaluating and grading participation is very tricky and demanding. Engagement is hard to achieve both in the classroom and between classes.

Our Solution

Ment.io is an AI-based discussion platform that allows you to continuously engage and evaluate participants through high-quality discussions.

Inclusivity

Hear all voices in the class

Ment.io guarantees every voice is heard in a crowded discussion and that each can influence the collaborative thinking.

Efficiency

Let the AI suggest credible assessment

Using Ment.io you can easily see the bottom line in a large discussion, and receive in-depth unprecedented student grading profile.

Transparency

Discussion summaries and analysis

Ment.io enables at-a-glance learning view as well as in-depth understanding of the class.

Structured easy-to-read discussions

Ordered by AI-based scoring

Deep analytics

Personal, Team, and Question analytics

Integrations

Ment.io works where you work

“Ment has been a tremendous asset in my course instruction. This not only saves time on grading student on-line discussion since students give each other feedback, it also provides a platform for a dynamic and lively exchange of ideas between students.”

Erika Weissinger
Visiting Assistant Professor

“The main value of Ment is that it forces people to have an opinion before they post something. The main features that enable this is that you need not only to respond, but (i) check whether someone already wrote it, so you need to respond to them, and (ii) a student must take a stand, rather than just write.”

Gad Allon
Professor of Operations, Information and Decision
