

Health Insurance Registration Procedures

1. Every student/scientist must complete and sign the Health Insurance Form. Any previous or current medical problems may affect the insurance coverage limitations. Please note that pre-existing conditions are not covered under the insurance.
2. For those students/scientists with preexisting medical condition, they are recommended to apply individually for the Prestige policy. The Prestige covers up to 35000 shekels in the event of worsening of preexisting medical condition.
3. Each case is individually considered based on age, period of insurance and the severity of the medical condition.
4. Please complete all details requested on the Health Insurance Form. If the answer to any question on the form is yes, you may be asked after sending the form for a recent, up-to-date letter from your attending physician about the relevant condition, including history and current status. This material will then be presented to Harel Insurance Company, and their decision regarding approval will be sent to you within a few days.
5. Participants are recommended to complete the process of submitting the application and payment forms about 30-60 days prior to their arrival to Israel.
6. All special cases should be directed to Harel-Yedidim in advanced of the student's arrival in Israel.
7. Please note that Pregnancy follow up is only available at the Prestige policy. Childbirth is not included in any of the medical plans.
8. WE are always pleased to be of service.

Sincerely,

Einat Cohen

The Division for Overseas Visitors and Students
