A workshop organized by Prof. Avishai Henik and Dr. Orly Rubinsten on **The Cognitive and Neural Basis for the Development of Numeric Understanding** will take place April 26-30, 2015 in Israel. This workshop is one of the activities carried out by the Center for the Neurocognitive Basis of Numerical Cognition (CNBNC), made possible by the Israeli Science Foundation in the framework of their Centers of Excellence, in collaboration with the Edmond J. Safra Brain Research Center for the Study of Learning Disabilities in Haifa.

The workshop will begin in Beer Sheva at Ben-Gurion University of the Negev on April 26 and 27. This will be followed by a private event for the speakers on Tuesday April 28, and on Wednesday and Thursday the workshop will continue at the University of Haifa.

The themes covered in the conference will include BASIC PROCESSES; DEFICIENCIES AND REHABILITATION; and WORKING MEMORY AND ARITHMETIC.

The slated speakers include: Daniel Algom, Daniel Ansari, Sarit Ashkenazi, Reuven Babai, Andrea Berger, Margarete Delazer, Martin Fischer, Shai Gabay, Dana Ganor-Stern, Susan Golden-Meadow, Liat Goldfarb, Avishai Henik, Torkel Klingberg, Evelyn Kroesbergen, Rosa Leikin, Bert Reynvoet, Orly Rubinsten, Samuel Shaki, Ruth Stavy, Joseph Tzelgov, and Dan Zakay.

Attendance is free but we ask everyone to register in advance so we can prepare for the size of the audience. To proceed to the registration page click [here](#) (Note, if the link does not work, please go to <http://goo.gl/De3gKQ> to register).

During the workshop there are slots designated for student (other) oral presentations (15 minutes + 5 minutes for questions and answers) and poster sessions. Abstract submission is now closed.

All inquiries should be sent to desiree@bgu.ac.il
