

001-2-2302	Guided Reading on Ecosystem Ecology and Biogeochemistry
------------	---

2 CREDITS

Objectives

The objective of this course is to discuss with student the concepts and ideas in terrestrial biogeochemistry. We will read papers relevant to student's research and discuss how his/her research is fitting into the larger picture of biogeochemical cycles. And what methods should be used to access questions are interesting to the student and relevant to specific research. A major theme for this course is the effect of human activity on biogeochemical cycles, and environmental change.

Structure of final course-grade: Component Weight Presentations 80% Class discussions 20% Total: 100%.
