

# A day in the life of a district ecologist

## Dr. Asaf Tsoar

District ecologist, southern district, Israel Nature and Parks Authority

14/1/2020, 12:00, Institute seminar room, Sede Boqer Campus

This talk will start by a short introduction to the INPA, who we are and where did we come from. Then I will present a few projects we are currently working on. As an example of our daily work as INPA ecologists and how we use ecological tools for biological conservation. I will examine three different issues that represent part of the wide range of issues we struggle with. How to better plan our future nature reserves, how we deal with ecological disasters and remediation of Ashalim wadi after the ecological disaster of 2018.
