

The Center for Humans and Machines (CHM) at the Max Planck Institute for Human Development in Berlin conducts interdisciplinary science to understand, anticipate, and shape major disruptions from digital media and Artificial Intelligence to the way we think, learn, work, play, cooperate and govern. Our goal is to understand how machines are shaping human society today and how they may continue to shape it in the future. The Center is comprised of an interdisciplinary, international and diverse group of scholars, and a science support team. To complement this team, we are looking to fill up to two (2) positions as Postdoctoral Researcher in Artificial Intelligence and Human Behaviour or Computational Social Science
