Name of the course: Introduction to Phonology
Lecturer name: Si Berrebi
Course number: 
Office hours: Sunday 12:00-13:00

Course description:
The course will introduce principles of human sound production (articulatory phonetics), the acoustic properties of speech sounds (acoustic phonetics) and features of the auditory system, that affect sound perception. We will see how the nature of production and perception influence the sound patterns of languages. The course also covers some of the essential background for courses in phonological theory, by reviewing the notions of phoneme, allophone, minimal pair and distinctive feature.
Finally, students will learn to use of the International Phonetic Alphabet (IPA), and transcribe basic acoustic displays on PRAAT.
