

Position: Researcher

Sigmabit is looking for a Researcher to join a technological “commando” team in the cellular communications domain.

You:

You are a seasoned Architect, Researcher, Designer, Analyst or Developer with proficiency in telecommunication systems, networking, algorithms and protocols.

You have real-life experience in communication networks, wireless technologies, location systems, cryptanalysis, security and cyber solutions.

You have the ability to research, analyze, reveal and break through complex and challenging domains.

You are a technology enthusiast who is keen to learn about upcoming technologies, as well as take part in their development.

The Job:

As a Researcher you will join new research domains, take part as a technological team member, investigate and explore new frontiers as part of the company strategic development cycle.

You will be involved with state of the art technologies and various systems disciplines including hardware, RF, firmware, signal processing and software.

Requirements:

Mandatory:

- Seasoned Architect, Researcher, Designer, Analyst or Developer
- Knowledgeable in electronics, science, computers or similar
- Strong analytical skills and problem solving abilities
- Enthusiastic open-minded out-of-the-box technologist
- Team player, solid people skills
- Good written skills in English

Advantages:

- Hands-on experience in wireless communication systems
- Participation in a significant research project
- Military service in one of the intelligence units

About Sigmabit:
