

H2020 MOBISTYLE Project

Motivating end-users behavioral change by combined ICT based tools and modular information services on energy use, indoor environment, health and lifestyle

Ana Tisov, Peter Op t Veld
H2020 Project Coordinator
Huygen Engineers & Consultants
Maastricht, the Netherlands

The Jeffrey Cook Workshop
26 November 2019
Ben-Gurion University, Israel

“We know less about the buildings in which we spend most of our time, than we know about the cornflakes we had for breakfast or coat we wore this morning.”

Actual and theoretical energy consumption per m² of detached housing per energy label

Performance gap in different building types

[UserTEC – User Practices, Technologies and Residential Energy Consumption]

Performance gap

Cause for performance gap:

- Prediction modelling
- Technical issues
- Poor metering
- Poor maintenance & commissioning
- **Occupant behavior**

MOBISTYLE

Let's change perception from
'Buildings consume energy'...

...to the fact that

'People use energy.'

MOBISTYLE: Motivating end-users behavioral change by combined ICT based tools and modular information services on energy use, indoor environment, health and lifestyle

Duration: October 2016 – March 2020

INGENIEURS & ADVISEURS

MOBISTYLE

MOBISTYLE Objectives

MOBISTYLE has the following specific measurable qualitative objectives:

- To transform measured data into **understandable information** for identified user profiles raising awareness on energy use, health and indoor environment.
- To motivate **long lasting behavioral change** of end users by combined **modular information on energy use, health and lifestyle**.
- To develop **easy to use ICT-based tools** which will make energy monitoring a **well-accepted and attractive** 'daily activity' (routine).
- To deploy and validate the developed solutions for 5 demonstration cases featuring **different building types and end user types**: employees in an office environment, residents in a social housing, students and staff in university buildings, residents living in a smart city, guests staying in a hotel.
- To foster **new business models** and applications.

The main quantitative objective of MOBISTYLE is reduction of buildings energy use for 16 %.

Change is gradual...

MOBISTYLE 4-step people-centric ICT design approach

IDENTIFICATION

Who are we solving for?

RESEARCH

What do people want?

INTERPRETATION

What and how will we create to serve the user needs?

USABILITY TESTING

What and how will we create to serve the user needs?

Design and development of services

improvements

*Denmark, Aalborg:
Residential area Kildeparken*

*The Netherlands, Kerkrade:
Office building Qeske*

*Poland, Wroclaw:
Smart city Wroclaw*

*Slovenia, Ljubljana:
Buildings of University
of Ljubljana*

*Italy, Turin:
Hotel LÓrologio*

GAME

DASHBOARD

OFFICE APP

INGENIEURS & ADVISEURS

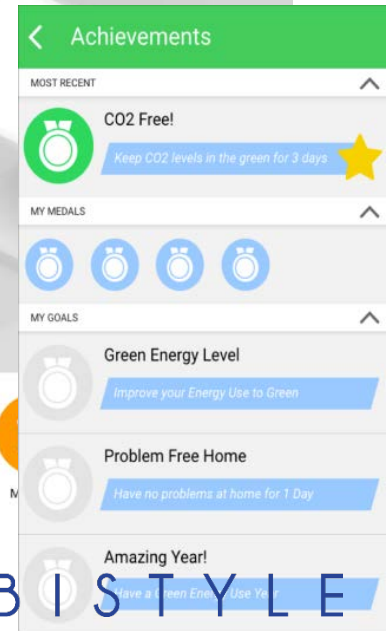

MOBISTYLE Game

Mobile application:

- Used in homes.
- Uses “nudges”, complemented by “tips”.
- Using data from energy-IEQ sensors.
- Triggers missions & detects their completion.

→ Game developer:

MOBISTYLE

MOBISTYLE Dashboard

Desktop and Mobile application:

- Used in universities & hotel demonstration cases.
- Aimed to both consumers & company managers.

The screenshot displays the MOBISTYLE dashboard for a 'Two-room with balcony - 402'. It features a room layout with sensors for Smart Plug, Op. T, CO₂, and RH. Real-time data includes: 21.8 °C Temperature, 48.5 % Humidity, 711.5 ppm Indoor CO₂, and 13211 CO₂ impact. A suggestions timeline for Room 402 shows alerts like 'PLEASE OPEN A WINDOW!' and 'HUMIDIFY YOUR AIR ONCE IN A WHILE!'.

→ Dashboard developer:

MOBISTYLE

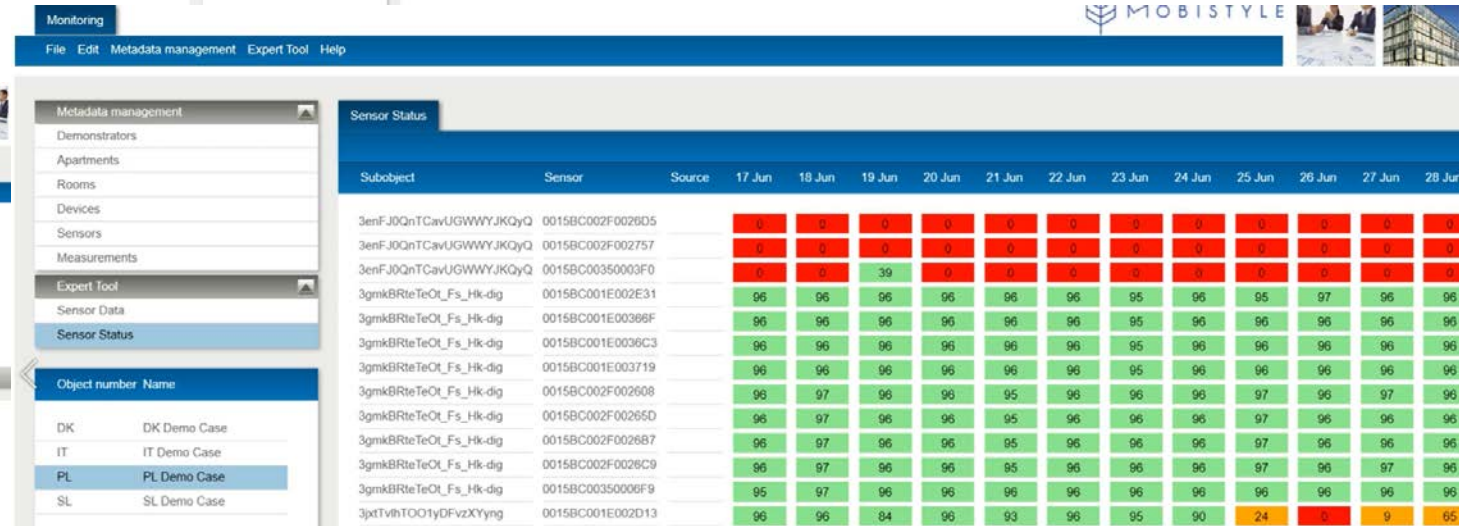

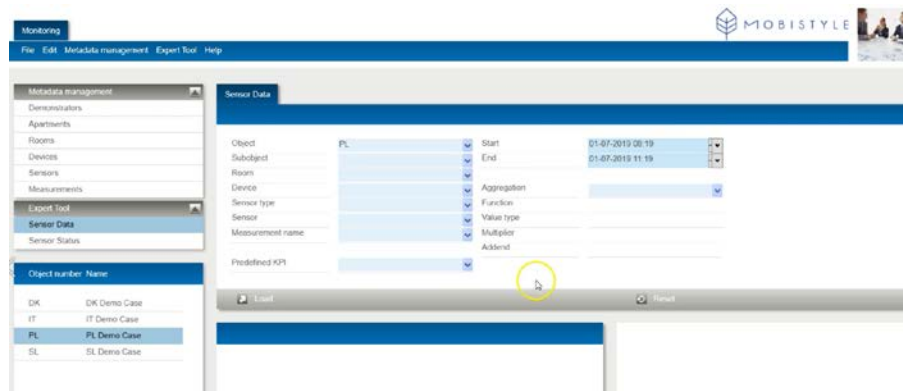

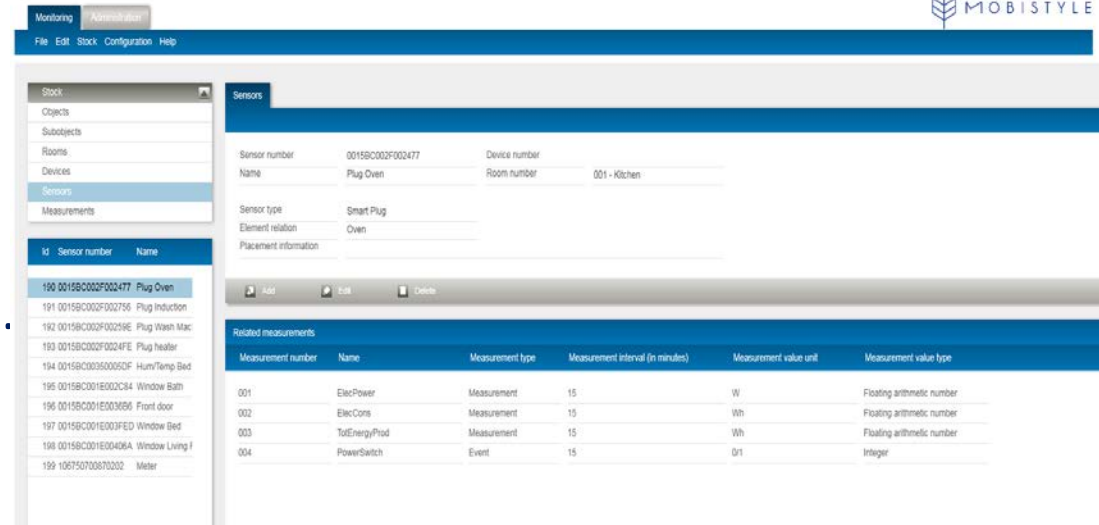

MOBISTYLE Expert tool

Desktop application:

- Primarily for building managers and experts.
- Allowing:
 - Data management;
 - KPI calculation;
 - Interoperability.

→Expert tool developer:

MOBISTYLE Office App

Desktop application:

- Aimed for employees & company managers.
- Used primarily to encourage dynamic indoor conditions.

→ Office App responsible:

MOBISTYLE

Are comfortable stable temperatures actually healthy?

The Thermo-neutral zone (*):

 Maastricht University

Experimental studies at MU showed that regular exposure to mild cold can increase:

- Energy expenditure, energy metabolism (*)
- Resilience to thermal discomfort due to acclimation (*, ***)
- Resilience to cardiovascular disease and insulin sensitivity (**)

Wat vindt u van het alghele binnenklimaat?

Feedback responses alghele binnenklimaat

The dashboard displays the current temperature as 23°C and a line graph for the temperature profile. Below this is a survey question: 'Wat vindt u van het alghele binnenklimaat?' with three smiley face options (happy, neutral, sad). A bar chart titled 'Feedback responses alghele binnenklimaat' shows the distribution of responses over time. The chart has a y-axis for 'Aantal responses' (0-5) and an x-axis for 'Tijd' (08:00-18:00). The bars are stacked with green, yellow, and red segments. The HUyGEN and MOBISTYLE logos are at the bottom.

Tijd	Happy (Green)	Neutral (Yellow)	Sad (Red)
08:00	1	1	1
09:00	2	1	1
10:00	3	1	1
11:00	4	1	1
12:00	3	1	1
13:00	2	1	1
14:00	1	1	1
15:00	1	1	1
16:00	1	1	1
17:00	1	1	1
18:00	1	1	1

“MOBISTYLE is the way of life...

Let me tell you why!”

Health is today’s wealth.

Promote solutions and services where goals on energy efficiency, good IEQ and health overlap.

Energy conscious and healthy behaviour becomes a way of life and not only a one-time service, noticed as energy saving at the end of the month.

Reduced energy bills	16 %
Improved indoor climate	21 %
Improved health	5 %

Thank you for your attention.
