Name of the module: Hematology 3rd year Medicine Number of module 47183023

BGU Credits: 4.5

ECTS credits:

Academic year: 3rd year medicine

Semester: first semester, 6-

21/11/2012

Hours of instruction: 8:15am

4:00pm

Lectures 68 hours

Laboratory 4 hours

Clinical discussions 8 hours

PBLs 2 hours

<u>Location of instruction</u>: Daily lectures wil take place in the Deichmann Building for Health Professions.

Specific classroom numbers are indicated in the schedule.

<u>Language of instruction</u>: Lectures will be given in Hebrew.

Cycle: B.Med.Sc

<u>Position</u>: Obligatory module intended for 3rd year medical students, as part of their preclinical teaching.

Field of Education: Hematology.

Responsible department: Institution of

Hematology, Soroka University

Medical Center.

higher.

General prerequisites: Students should complete successfully the following modules (given in prior 2 years medicine): Basic pathology, Molecular Biology, Medical Biochemistry, Medical Physiology .

Grading scale: Successful passing of multiple-choice questions

examination with a score of 65 or

Course Description:

<u>Aims of the module</u>: The goal of the hematology module is to introduce and teach basic principles and practice in hematology.

<u>Objectives of the module</u>: Objectives are to enable students to classify and to have basic understanding of red, white blood cells and coagulation disorders, and to incorporate laboratory findings into clinical problem solving.

<u>Learning outcomes of the module</u>: On successful completion of the course, the student should be able to:

- 1. Describe normal peripheral smear and bone marrow findings and correlate these to pertinent laboratory tests used to evaluate hematologic disorders.
- 2. Classify red blood cell disorders (anemias) and apply laboratory values in clinical decision making.
- 3. Describe the coagulation cascade, pertinent laboratory tests used to assess coagulation function and correlate with diseases of coagulation dysfunction.
- 4. Define thrombocytopenia and distinguish between qualitative and quantitative platelet disorders; formulate a differential diagnosis based on clinical findings and laboratory data.
- 5. Classify white blood cell disorders (leukemia, lymphoma and multiple myeloma) and compare pathologic features of each category.
- 6. Apply clinical laboratory and ancillary molecular diagnostic testing to develop a differential and a diagnosis of white blood cell disorders.

<u>Attendance regulation</u>: Attendance to the oral lectures is not obligatory. Participation in the PBLs, Clinical discussions and Labs is obligatory.

<u>Teaching arrangement and method of instruction</u>: Instruction in the module is based on frontal oral lectures, clinical discussions, PBLs, and histo-pathological labs. Computer based labs will also be used.

Lecturer: Dr. Ory Rouvio

Contact details: Cell 054-4709242

Email: rubio@bgu.ac.il

Module evaluation: at the end of the semester the students will evaluate the module, in order to draw conclusions, and for the university's internal needs

Confirmation: 2012 (academic year)

Last update: 10/2012

Assessment:

Students will be assessed in the module only by passing MCQ exam with a score of 65 or higher.

<u>Work and assignments</u>: Students are required to take active part in the PBLs meetings, and present a ten minute presention to the whole class – summarizing their PBL.

<u>Time required for individual work</u>: in addition to attendance in class, the students are expected to do their assignment and individual work:

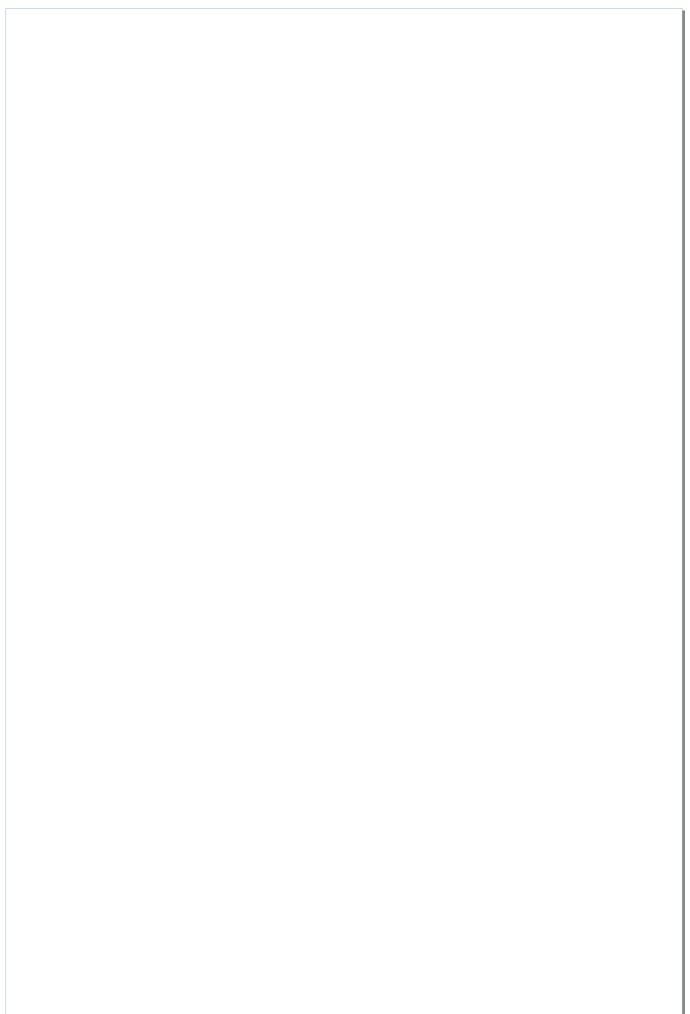

Due to the method of modules in 3rd year – students are required to study and review the lectures at home. Roughly 30 minutes per an hour lecture. PBL learning and preparation will take 4hr.

<u>Module Content\</u> schedule and outlines: the content and structure of the module, including detailed subjects, and their order.

<u>Required reading</u>: Students are expected to read the lectures as presented as ppt presentations.

<u>Additional literature</u>: Bibliography of the module is based on Essential Haematology, 6th Edition. Wiley-Blackwell (STMS), 2/25/2011, and Harrison's Principles of Internal Medicine 18th Edition (p 448-482, 844-988)

*All learning material will be available to the students on the module's website (high-learn)/ library/ electronic documents available to BGU students
