Psychological Data Science Seminar 101.2.0529

Instructor

Dr. Michael Gilead

Email

mgilead@bgu.ac.il

Academic Year, Semesters

2018-2019, Semester A

Number of Hours/ Credits

2

Mandatory/Elective

Mandatory for data science students

Prerequisites

None

Year in program & how often given, if relevant

Year 1 or 2, M.A.

Course Overview – Short abstract

In this course, students will hear guest lectures from speakers from the industry and academia. The speakers will present work that utilizes methods from the data scientists' toolkit to better understand and predict human behavior.

Learning Outcomes – Short description

The students will learn about the types of research and potential applications that can be done with the methods and knowledge they acquire during their studies.

Assessment: Coursework and Grade structure

Grading will be based on participation in class discussion, and a final project wherein they will present ideas for methods that address the challenges faced by one of the guest lecturers in their work.
