

Dr. Meir Kalech

*Information System Engineering Department,
Ben Gurion University of the Negev*

Short bio:

Meir Kalech finished his Ph.D. in the Computer Science Department at Bar-Ilan University in 2006.

From 2008 he is a faculty member in the Department of Information System Engineering in Ben-Gurion University of the Negev.

Kalech's research interests lie in artificial intelligence and specifically in anomaly detection and diagnosis. He is a recognized expert in model-based diagnosis (MBD) and published dozens papers in leading journals and refereed conferences.

Kalech established the Anomaly Detection and Diagnosis Laboratory at Ben-Gurion University, which promotes research with the government and companies as General Motors and Israel Aircraft Industries
