

Mr. Nir Moses-Heller

Intel, Israel

Short bio:

Nir Moses-Heller finished his B.Sc. in Computer Science Department at Technion in 2004.

Nir then joined Intel Israel started out as software test engineer and later on as team leader in CPU test software development team supporting all the latest Intel CPU products such as Centrino, Core, Core2, Core i3/5/7 and future products.

Nir has vast experience in developing CPU test algorithms and has more than 4 years of experience with architecture, design and development of test system for SW validation in a unique environment of silicon response based algorithms.

Nir is also a member of the Haifa backend agile transition team, taking active roles as a product owner and a SCRUM master, providing Agile mentoring and coaching for Intel engineers.
